ANTIMICROBIAL INTERIOR PAINT

FOR INCREASING THE HYGIENE LEVEL OF INDOOR SURFACES

# Biora Clean

## keeps the bacteria at bay in the kitchen and utility room

**Biora Clean** is an antimicrobial indoor paint that helps keep the challenging spaces at home clean and hygienic. Due to its characteristics, it is suitable for spaces which require ease of cleaning and in which people do not wish to give bacteria a free rein, such as toilets, utility rooms and kitchens.

Biora Clean increases the hygiene level of indoor spaces by reducing the level of microbes on the painted surface. The active ingredient in Biora Clean is silver, whose ions provide antimicrobial protection to the surface. Silver ions disrupt the metabolism of microbes and prevent cells from dividing, i.e. microbes from multiplying.

Matt Biora Clean is suitable for use on indoor walls and ceilings. The paint is applied like any other indoor paint. It can be tinted with any shade from the interior colour chart.

As with Biora paints, Biora Clean has been granted the Finnish Allergy Label, which means that the paint does not include odorants, allergens or irritants.

### Number of bacteria on surface painted with Biora Clean 0–24hrs

Biora Clean's antimicrobial characteristic increases the hygiene level of indoor spaces by reducing the level of microbes on the painted surface. The active ingredient is silver. The paint film retains its antimicrobial property throughout its lifespan. The product's antimicrobial efficiency has been tested according to standard ISO 22196.

**NEW!**

### BIORA CLEAN – Antimicrobial indoor paint

A waterborne, solvent-free acrylate paint. Suitable for previously painted or primed wall and roof materials, such as concrete, brick, plaster or building board surfaces. Improves the hygiene level of indoor spaces by reducing the level of microbes on the painted surface. **Gloss group:** 5, matt. **Spreading capacity:** 8-10 m<sup>2</sup>/l. **Colour:** Base paints 1 and 3, can be tinted to obtain the shades shown on Interior Colour Cards. **Package sizes:** 0.9 l, 2.7 l and 9 l.
