TEKNOLAC PRIMER 0168-00 paint systems consist of different kind of fast drying alkyd paints having very good corrosion protection properties. TEKNOLAC PRIMER 0168-00 contains efficient active anticorrosive pigments.

These paint systems are designed for corrosivity categories C3 - C4 with durability classes very high - high.

These Teknos painting systems have been designed in accordance with ISO 12944:2017-2018 standards. In order to reach the durability ranges in specified corrosivity categories, care must be taken to ensure full compliance of steel construction design, steel prework and surface preparation quality with ISO 12944 standards.

Surface preparation

Remove from the surfaces any contaminants that might be detrimental to surface preparation and painting. Remove also water-soluble salts by using appropriate methods.

Steel surfaces: Remove mill scale and rust by blast cleaning to preparation grade Sa 21/2 (standard ISO 8501-1).
