AQUA

WATERBORNE
SPECIAL VARNISH**DURABLE WOOD VARNISH
FOR INDOOR AND OUTDOOR USE**

Extra durable waterborne universal varnish

Helo Aqua is a waterborne special varnish. It is particularly easy to use and is highly durable. In addition to easy applicability, the varnish dries quickly. An overcoat can be added in as soon as one hour, allowing several layers to be applied in one day.

The Helo Aqua series of products includes three gloss level alternatives: semi-matte, semi-gloss and gloss. All gloss levels are suitable for treating wooden surfaces both indoors and out. Indoors, the various gloss levels of Helo Aqua are suitable for varnishing all wooden surfaces, such as wooden floors and stairs, doors, kitchen units, furniture, and wall and ceiling panels. Outdoors, tinted Helo Aqua can be used for the transparent varnishing of doors and window frames, among other surfaces.

Helo Aqua leaves a beautiful, smooth finish and, when tinted, gives a deep transparent colour to wooden surfaces. A new Transparent Indoor Tints colour chart with 45 different shades has been published for transparent varnishing purposes.
