ROOF TILE PAINT

**FOR THE MAINTENANCE PAINTING
OF CONCRETE ROOF TILES OUTDOORS**

Prolong the life cycle of roof tiling by painting

A concrete roof tile is a traditional, popular roofing material used in houses. The life cycle expectation of roof tiling is long, but when it is exposed to harsh weather, its surface deteriorates and becomes dirty and discoloured. The surface treatment of roof tiles through the application of paint is easy and it prolongs the useful life of roof tiling.

Kirjo Tile is a special paint developed for the maintenance painting of tile roofs. It protects tiles against moisture, degradation and dirt. Kirjo Tile roof tile paint's adhesion is good on tile roofing that has been cleaned carefully.

Also, the colour of an old tile roofing can easily be changed by using roof tile paint. The painted surface retains its colour while maintaining the impressive appearance of a house.

NEW!
