PAINTING SYSTEM C101E.3 FUTURA AQUA 40

Previously painted or powder coated surfaces.

PAINTING PHASE

C Maintenance painting

SUBSTRATE

C101 Previously painted surfaces
C108 Varnished surfaces
C109 Powdercoated surfaces

STRESS CATEGORY

SC 13 Severe climate pollution outdoors

GLOSS

03 Semi-gloss

PRETREATMENT

Wash the surfaces with RENSA SUPER Paint cleaner. For moldy surfaces use RENSA FACADE Facade cleaner. Remove all loose paint. Matt down hard or gloss surfaces by sanding and thereafter remove the dust.

APPLICATION

Prime the surface 1 x with FUTURA AQUA PRIMER. For bare or rusted metal surfaces use FERREX AQUA Anticorrosive paint. Topcoat 1 x with FUTURA AQUA 40.

PRODUCTS

FUTURA AQUA 40

A durable top coat for furniture, doors and windows indoors and outdoors.

FUTURA AQUA PRIMER

An adhesion primer for wooden and galvanized surfaces indoors as well as for wooden surfaces outdoors.

RENSA FACADE

An efficient detergent for washing external surfaces of buildings and pre-treating surfaces before painting.

FERREX AQUA

An anticorrosive paint and adhesion primer for iron and steel surfaces.

RENSA SUPER

An efficient universal detergent for washing of all kind of building surfaces and for pre-treating surfaces before painting. No need to rinse with water.

More specific product information in technical data sheet. Painting system search recommends products based on the information you provide and does not take into account any specific needs of the site, e.g. the quality of the material to be painted or the properties of the previous paint. The main responsibility lies with the designer.
