Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2020/878 - United Kingdom: Northern Ireland

# **SAFETY DATA SHEET**

ALPOTECT PHOSPHATGRUND 5100-00 - All variants

## SECTION 1: Identification of the substance/mixture and of the company/ undertaking

1.1 Product identifier

Product name : ALPOTECT PHOSPHATGRUND 5100-00 - All variants

**1.2 Relevant identified uses of the substance or mixture and uses advised againstProduct use**: Paint.

#### 1.3 Details of the supplier of the safety data sheet

Teknos Group Oy, Takkatie 3, FI-00370 HELSINKI, FINLAND. Tel. +358 9 506 091.

e-mail address of person : Prod-safe@teknos.com responsible for this SDS

#### National contact

Teknos Ireland Limited, 52 Ballymoughan Road, Magherafelt, BT45 6HN, UK. Tel. +44 (0) 2879 301 472.

#### 1.4 Emergency telephone number

National advisory body/Poison Centre

Telephone number : NHS: 111

### **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture

Product definition : Mixture

Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Flam. Liq. 3, H226 Skin Irrit. 2, H315 Eye Irrit. 2, H319 Skin Sens. 1, H317 STOT RE 2, H373 Aquatic Chronic 2, H411

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

ŝ,

See Section 11 for more detailed information on health effects and symptoms.

#### 2.2 Label elements

Hazard pictograms

| Signal word                         | : Warning   |  |  |
|-------------------------------------|---|--|--|
| Hazard statements                   | <ul> <li>H226 - Flammable liquid and vapour.</li> <li>H315 - Causes skin irritation.</li> <li>H317 - May cause an allergic skin reaction.</li> <li>H319 - Causes serious eye irritation.</li> <li>H373 - May cause damage to organs through prolonged or repeated exposure.</li> <li>H411 - Toxic to aquatic life with long lasting effects.</li> </ul> |  |  |
| Precautionary statements<br>General | : P103 - Read carefully and follow all instructions.  |  |  |

 $\land \land \land$ 

## **SECTION 2: Hazards identification**

| SECTION 2: Hazards  | Ц |  |
|---|---|--|
| Prevention  | - | <ul> <li>P280 - Wear protective gloves. Wear eye or face protection.</li> <li>P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.</li> <li>P273 - Avoid release to the environment.</li> </ul> |
| Response  | : | P391 - Collect spillage.   |
| Storage   | : | Not applicable.  |
| Disposal  | : | P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.   |
| Hazardous ingredients   | : | Contains: Reaction product: bisphenol A-(epichlorhydrin); epoxy resin (number average molecular weight <=700) and Xylene   |
| Supplemental label<br>elements  | : |  |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles | : |  |
| 2.3 Other hazards   |   |  |
| Product meets the criteria<br>for PBT or vPvB according<br>to Regulation (EC) No.<br>1907/2006, Annex XIII  | : | This mixture does not contain any substances that are assessed to be a PBT or a vPvB.  |
| Other hazards which do  | : | None known.  |

## **SECTION 3: Composition/information on ingredients**

not result in classification

| 3.2 Mixtures   | : Mixture   |                  |  |   |         |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of

equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section. <u>Type</u>

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

Occupational exposure limits, if available, are listed in Section 8.

## **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

| Eye contact  | : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.  |
|--------------|--|
| Inhalation   | : Remove victim to fresh air and keep at rest in a position comfortable for breathing.<br>If not breathing, if breathing is irregular or if respiratory arrest occurs, provide<br>artificial respiration or oxygen by trained personnel. It may be dangerous to the<br>person providing aid to give mouth-to-mouth resuscitation. Get medical attention<br>following exposure or if feeling unwell. If unconscious, place in recovery position<br>and get medical attention immediately. Maintain an open airway. Loosen tight<br>clothing such as a collar, tie, belt or waistband. |
| Skin contact | : Wash with plenty of soap and water. Remove contaminated clothing and shoes.<br>Wash contaminated clothing thoroughly with water before removing it, or wear<br>gloves. Continue to rinse for at least 10 minutes. Get medical attention. In the<br>event of any complaints or symptoms, avoid further exposure. Wash clothing before<br>reuse. Clean shoes thoroughly before reuse.  |

## SECTION 4: First aid measures

| Ingestion                  | : Wash out mouth with water. Remove dentures if any. If material has been<br>swallowed and the exposed person is conscious, give small quantities of water to<br>drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not<br>induce vomiting unless directed to do so by medical personnel. If vomiting occurs,<br>the head should be kept low so that vomit does not enter the lungs. Get medical<br>attention following exposure or if feeling unwell. Never give anything by mouth to an<br>unconscious person. If unconscious, place in recovery position and get medical<br>attention immediately. Maintain an open airway. Loosen tight clothing such as a<br>collar, tie, belt or waistband. |
|----------------------------|--|
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.  |

| 4.2 Most important symptom<br>Over-exposure signs/symptom | s and effects, both acute and delayed<br>toms  |
|---|--|
| Eye contact   | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness |
| Inhalation  | : No specific data.  |
| Skin contact  | : Adverse symptoms may include the following:<br>irritation<br>redness                     |
| Ingestion   | : No specific data.  |

#### 4.3 Indication of any immediate medical attention and special treatment needed

| Notes to physician  | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul> |
|---------------------|---|
| Specific treatments | : No specific treatment.  |

## **SECTION 5: Firefighting measures**

| 5.1 Extinguishing media                      |  |
|--|--|
| Suitable extinguishing media                 | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.   |
| Unsuitable extinguishing media               | : Do not use water jet.  |
| 5.2 Special hazards arising f                | rom the substance or mixture   |
| Hazards from the substance or mixture        | : Flammable liquid and vapour. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst, with<br>the risk of a subsequent explosion. This material is toxic to aquatic life with long<br>lasting effects. Fire water contaminated with this material must be contained and<br>prevented from being discharged to any waterway, sewer or drain. |
| Hazardous combustion<br>products             | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>phosphorus oxides<br>halogenated compounds<br>metal oxide/oxides   |
| 5.3 Advice for firefighters                  |  |
| Special protective actions for fire-fighters | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.   |

## **SECTION 5: Firefighting measures**

| Special protective          | : Fire-fighters should wear appropriate protective equipment and self-contained     |
|-----------------------------|---|
| equipment for fire-fighters | breathing apparatus (SCBA) with a full face-piece operated in positive pressure     |
|                             | mode. Clothing for fire-fighters (including helmets, protective boots and gloves)   |
|                             | conforming to European standard EN 469 will provide a basic level of protection for |
|                             | chemical incidents.   |

### **SECTION 6: Accidental release measures**

| 6.1 Personal precautions, protective equipment and emergency procedures |  |  |
|---|--|--|
| For non-emergency   | : No action shall be taken involving any personal risk or without suitable training. |  |
| personnel   | Evacuate surrounding areas. Keep unnecessary and unprotected personnel fro           |  |

rsonnelEvacuate surrounding areas. Keep unnecessary and unprotected personnel from<br/>entering. Do not touch or walk through spilt material. Shut off all ignition sources.<br/>No flares, smoking or flames in hazard area. Avoid breathing vapour or mist.<br/>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br/>inadequate. Put on appropriate personal protective equipment.

- **For emergency responders** : If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
- 6.2 Environmental precautions
   Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.

#### 6.3 Methods and material for containment and cleaning up

| Small spill                     | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
|---------------------------------|--|
| Large spill                     | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. |
| 6.4 Reference to other sections | : See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protective equipment.<br>See Section 13 for additional waste treatment information.  |

## **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

| Protective measures | : | Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not breathe vapour or mist. Do not ingest. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain |
|---------------------|---|--|
|                     |   | precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.   |

## **SECTION 7: Handling and storage**

Advice on general occupational hygiene

: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

#### 7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Separate from oxidising materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.

#### Seveso Directive - Reporting thresholds

#### Danger criteria

|     | Notification and MAPP threshold | Safety report threshold |
|-----|---------------------------------|-------------------------|
| P5c | 5000 tonne                      | 50000 tonne             |
| E2  | 200 tonne                       | 500 tonne               |

#### 7.3 Specific end use(s)

Recommendations

: Not available. : Not available.

# Industrial sector specific solutions

## **SECTION 8: Exposure controls/personal protection**

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.

#### 8.1 Control parameters

#### **Occupational exposure limits**

| Product/ingredient name         | Exposure limit values   |
|---------------------------------|---|
| Xylene                          | EH40/2005 WELs (United Kingdom (UK), 1/2020). [xylene, o-,m-, |
|                                 | p- or mixed isomers] Absorbed through skin.                   |
|                                 | STEL: 441 mg/m <sup>3</sup> 15 minutes.                       |

| 8.2 Exposure controls            |   |
|----------------------------------|---|
| Appropriate engineering controls | : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.  |
| Individual protection meas       | <u>ures</u>   |
| Hygiene measures                 | : Wash hands, forearms and face thoroughly after handling chemical products,<br>before eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.   |
| Eye/face protection              | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.  |
| Skin protection                  |   |
| Hand protection                  | : Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |
| Body protection                  | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves. Refer to<br>European Standard EN 1149 for further information on material and design<br>requirements and test methods.  |
| Other skin protection            | <ul> <li>Appropriate footwear and any additional skin protection measures should be<br/>selected based on the task being performed and the risks involved and should be<br/>approved by a specialist before handling this product.</li> </ul>   |
| Respiratory protection           | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.  |
| Environmental exposure controls  | : Emissions from ventilation or work process equipment should be checked to<br>ensure they comply with the requirements of environmental protection legislation.<br>In some cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.   |

## **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

#### Specific target organ toxicity (single exposure)

| Product/ingredient name                  | Category   | Route of exposure | Target organs                |
|--|------------|-------------------|------------------------------|
| Xylene                                   | Category 3 | -                 | Respiratory tract irritation |
| 1-Methoxy 2-propanol                     | Category 3 | -                 | Narcotic effects             |
| 2-Methoxy-1-methylethyl acetate          | Category 3 | -                 | Narcotic effects             |
| Solvent naphtha (petroleum), light arom. | Category 3 | -                 | Respiratory tract irritation |

#### Specific target organ toxicity (repeated exposure)

| Product/ingredient name | Category   | Route of exposure | Target organs  |
|-------------------------|------------|-------------------|----------------|
| Xylene                  | Category 2 | oral, inhalation  | -              |
| Ethylbenzene            | Category 2 | oral, inhalation  | hearing organs |

#### **Aspiration hazard**

| Product/ingredient name                      | Result                         |
|--|--------------------------------|
| Xylene                                       | ASPIRATION HAZARD - Category 1 |
| Ethylbenzene                                 | ASPIRATION HAZARD - Category 1 |
| Solvent naphtha (petroleum), light arom.     | ASPIRATION HAZARD - Category 1 |
| Naphtha (petroleum), hydrodesulfurized heavy | ASPIRATION HAZARD - Category 1 |

## Information on likely routes : Not available. of exposure

# Potential acute health effectsEye contact: Causes serious eye irritation.

| Inhalation   | : No known significant effects or critical hazards.            |
|--------------|--|
| Skin contact | : Causes skin irritation. May cause an allergic skin reaction. |
| Ingestion    | : No known significant effects or critical hazards.            |

#### Symptoms related to the physical, chemical and toxicological characteristics

| <b>SECTION 11: Toxicol</b>    |     |  |
|-------------------------------|-----|--|
| Eye contact                   | :   | Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness   |
| Inhalation                    | 1   | No specific data.  |
| Skin contact                  | :   | Adverse symptoms may include the following:<br>irritation<br>redness   |
| Ingestion                     | :   | No specific data.  |
| Delayed and immediate effec   | ts  | as well as chronic effects from short and long-term exposure   |
| <u>Short term exposure</u>    |     |  |
| Potential immediate effects   | :   | Not available.   |
| Potential delayed effects     | :   | Not available.   |
| <u>Long term exposure</u>     |     |  |
| Potential immediate effects   | :   | Not available.   |
| Potential delayed effects     | :   | Not available.   |
| Potential chronic health effe | ect | <u>S</u>   |
| Not available.                |     |  |
| Conclusion/Summary            | :   | Not available.   |
| General                       | :   | May cause damage to organs through prolonged or repeated exposure. Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels. |
| Carcinogenicity               | :   | No known significant effects or critical hazards.  |
| Mutagenicity                  | :   | No known significant effects or critical hazards.  |
| Reproductive toxicity         |     | No known significant effects or critical hazards.  |

#### 11.2 Information on other hazards

11.2.1 Endocrine disrupting properties

Not available.

#### **11.2.2 Other information**

Not available.

## **SECTION 12: Ecological information**

### 12.1 Toxicity

| Product/ingredient name     | Result                            | Species  | Exposure |
|-----------------------------|-----------------------------------|--|----------|
| Trizinc bis(orthophosphate) | Acute EC50 0.32 mg/l              | Algae - Selenastrum capricornutum  | 72 hours |
|                             | Acute EC50 0.96 mg/l              | Crustaceans - Ceriodaphnia dubia   | 48 hours |
| Zinc oxide                  | Acute IC50 46 μg/l Fresh water    | Algae - <i>Pseudokirchneriella</i><br><i>subcapitata</i> - Exponential<br>growth phase | 72 hours |
|                             | Acute IC50 1.85 mg/l Marine water | Algae - Skeletonema costatum   | 96 hours |
|                             | Acute LC50 98 µg/l Fresh water    | Daphnia - <i>Daphnia magna</i> -<br>Neonate  | 48 hours |
|                             | Acute LC50 1.1 ppm Fresh water    | Fish - Oncorhynchus mykiss   | 96 hours |

**Conclusion/Summary** : Toxic to aquatic life with long lasting effects.

#### 12.2 Persistence and degradability

Conclusion/Summary

: This product has not been tested for biodegradation.

| Date of issue/Date of revision | : 13/03/2024  | Date of previous issue | : No previous validation | Version : 1    | 13/18 |

## **SECTION 12: Ecological information**

#### 12.3 Bioaccumulative potential

| Product/ingredient name  | LogPow       | BCF         | Potential |  |
|--|--------------|-------------|-----------|--|
| Reaction product: bisphenol<br>A-(epichlorhydrin); epoxy<br>resin (number average<br>molecular weight <=700) | 2.64 to 3.78 | 31          | Low       |  |
| Xylene   | 3.12         | 8.1 to 25.9 | Low       |  |
| Trizinc bis(orthophosphate)  | -            | 60960       | High      |  |
| 1-Methoxy 2-propanol   | <1           | -           | Low       |  |
| Ethylbenzene   | 3.6          | -           | Low       |  |
| 2-Methoxy-1-methylethyl acetate  | 1.2          | -           | Low       |  |
| Solvent naphtha (petroleum), light arom.   | -            | 10 to 2500  | High      |  |
| Naphtha (petroleum),<br>hydrodesulfurized heavy  | -            | 10 to 2500  | High      |  |
| Zinc oxide   | -            | 28960       | High      |  |

| 12.4 Mobility in soil                  |                  |
|--|------------------|
| Soil/water partition coefficient (Koc) | : Not available. |
| Mobility                               | : Not available. |

#### 12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

#### 12.6 Endocrine disrupting properties

Not available.

#### 12.7 Other adverse effects

No known significant effects or critical hazards.

## **SECTION 13: Disposal considerations**

| 13.1 Waste treatment meth | ods   |
|---------------------------|---|
| Product                   |   |
| Methods of disposal       | : The generation of waste should be avoided or minimised wherever possible.<br>Disposal of this product, solutions and any by-products should at all times comply<br>with the requirements of environmental protection and waste disposal legislation and<br>any regional local authority requirements. Dispose of surplus and non-recyclable<br>products via a licensed waste disposal contractor. Waste should not be disposed of<br>untreated to the sewer unless fully compliant with the requirements of all authorities<br>with jurisdiction. |
| Packaging                 |   |
| Methods of disposal       | : The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.  |
| Special precautions       | : This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.         |
