04 First aid measures

- After inhalation:
- Supply fresh air; consult doctor in case of complaints.
- After skin contact:
- Immediately wash with water and soap and rinse thoroughly. • After eye contact:
- Rinse opened eye for several minutes under running water.
- After swallowing: Do not induce vomiting; call for medical help immediately.

05 Firefighting measures

- Suitable extinguishing agents:
- CO2, powder or water spray. Fight larger fires with water spray or alcohol resistant foam.
- For safety reasons unsuitable extinguishing agents: Water with full jet
 Special hazards arising from the substance or mixture
- Formation of toxic gases is possible during heating or in case of fire.
- Protective equipment: Mouth respiratory protective device. Do not inhale explosion gases or combustion gases.
 Additional information
- Additional information
 Cool endangered receptacles with water spray.
 Collect contaminated fire fighting water separately. It must not enter the sewage system.

06 Accidental release measures

- Personal precautions, protective equipment and emergency procedures Wear protective equipment. Keep unprotected persons away. Ensure adequate ventilation
 Environmental precautions:
- Do not allow product to reach sewage system or any water course. Inform respective authorities in case of seepage into water course or sewage system. Do not allow to enter sewers/ surface or ground water.
- Methods and material for containment and cleaning up:
- Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust).
- Reference to other sections
 See Section 7 for information on safe handling.
 See Section 8 for information on personal protection equipment.
- See Section 13 for disposal information.

07 Handling and storage

- Handling:
- Precautions for safe handling
- Take note of emission threshold.
- Ensure good interior ventilation, especially at floor level. (Fumes are heavier than air).
- Information about fire and explosion protection:

Keep ignition sources away - Do not smoke.	
Protect against electrostatic charges.	
Storage:	
 Requirements to be met by storerooms and receptacles: 	
Store only in the original receptacle.	
 Information about storage in one common storage facility: 	
Not required.	
 Further information about storage conditions: 	
Keep container tightly sealed.	
Store in cool, dry conditions in well sealed receptacles.	
Protect from heat and direct sunlight.	
Specific end use(s)	
No further relevant information available.

	ecautionary measures are to be adhered to when handling chemicals.
	ean skin thoroughly after work and before breaks.
	protection: Suitable respiratory protective device recommended.
 Protection of preparation. preparation/ 	hands: The glove material has to be impermeable and resistant to the product/ the substance/ the Due to missing tests no recommendation to the glove material can be given for the product/ the the chemical mixture. Selection of the glove material on consideration of the penetration times, rates and the degradation Impervious gloves
The selection varies from n the glove ma	n of the suitable gloves does not only depend on the material, but also on further marks of quality and nanufacturer to manufacturer. As the product is a preparation of several substances, the resistance of terial can not be calculated in advance and has therefore to be checked prior to the application.
	eak through time has to be found out by the manufacturer of the protective gloves and has to be
Therefore a r • Eye protection	ned penetration times according to EN 374 part III are not performed under practical conditions. maximum wearing time, which corresponds to 50% of the penetration time, is recommended. on: Safety glasses Tightly sealed goggles tion: Protective work clothing

09 Physical and chemical properties

Appearance	
Appearance:	
Form:	Liquid
Colour:	According to product specifica
Odour:	Characteristic Characteristic
Odour threshold:	Not determined.
Change in condition	
Initial boiling point and boiling range:	124 °C
Flash point:	27 °C
Flammability (solid, gas):	Not applicable.
Ignition temperature:	425 °C
Decomposition temperature:	Not determined.
Auto-ignition temperature:	Not determined.
Explosive properties:	Not determined.
Explosion limits:	
Lower:	1 Vol %
Upper:	7 Vol %
Vapour pressure:	at 20 °C 10,7000 mbar at 50 °C 55,0000 mbar
Density:	1,3200 g/cm3
Solubility in / Miscibility with	
water:	Not determined.

 - No irritant effect.
 - Serious eye damage/irritation No irritating effect.
 - *Respiratory or skin sensitisation* No sensitising effects known.

12 Ecological information

- Aquatic toxicity:
- No further relevant information available. • Persistence and degradability
- No further relevant information available.
- Behaviour in environmental systems:
- Bioaccumulative potential
- No further relevant information available.
- Additional ecological information:
- General notes:
- Water hazard class 2 (German Regulation) (Self-assessment): hazardous for water Do not allow product to reach ground water, water course or sewage system. Danger to drinking water if even small quantities leak into the ground.
