Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by UK REACH Regulation SI 2019/758

# **SAFETY DATA SHEET**

TEKNOLUX AQUA 1429-42 - TS 16047 CLEAR

### SECTION 1: Identification of the substance/mixture and of the company/ undertaking

#### 1.1 Product identifier Product name

: TEKNOLUX AQUA 1429-42 - TS 16047 CLEAR

**1.2 Relevant identified uses of the substance or mixture and uses advised againstProduct use**: Paint.

#### 1.3 Details of the supplier of the safety data sheet

Teknos Group Oy, Takkatie 3, FI-00370 HELSINKI, FINLAND. Tel. +358 9 506 091.

e-mail address of person : Prod-safe@teknos.com

#### responsible for this SDS National contact

Teknos (UK) Limited, 7 Longlands Rd, Bicester, Oxfordshire OX26 5AH, United Kingdom. Tel. +44 (0) 1869 208005.

#### **1.4 Emergency telephone number**

National advisory body/Poison Centre

Telephone number : NHS: 111

### **SECTION 2: Hazards identification**

2.1 Classification of the substance or mixture

Product definition : Mixture

**Classification according to UK CLP/GHS** 

Eye Irrit. 2, H319 Skin Sens. 1, H317 Aquatic Chronic 3, H412

The product is classified as hazardous according to UK CLP Regulation SI 2019/720 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

#### 2.2 Label elements

**Hazard pictograms** 

| Signal word<br>Hazard statements | ฬarning<br>ฬ317 - May cause an allergic skin reaction.<br>Ⅎ319 - Causes serious eye irritation.   |      |
|----------------------------------|---|------|
|                                  | 1412 - Harmful to aquatic life with long lasting effects.   |      |
| Precautionary statements         |   |      |
| Prevention                       | 2280 - Wear protective gloves. Wear eye or face protection.<br>2273 - Avoid release to the environment.<br>2261 - Avoid breathing vapour. |      |
| Response                         | 7362 + P364 - Take off contaminated clothing and wash it before reuse.<br>P302 + P352 - IF ON SKIN: Wash with plenty of water.            |      |
| Storage                          | Not applicable.   |      |
| Disposal                         | P501 - Dispose of contents and container in accordance with all local, region national and international regulations.                     | ıal, |
|                                  |   |      |

| Date of issue/Date of revision | : 20/11/2023   | Date of previous issue | : 25/09/2023 | Version  | :1.02 | 1/15 |
|--------------------------------|----------------|------------------------|--------------|----------|-------|------|
| TEKNOLUX AQUA 1429-42 - T      | TS 16047 CLEAF | R                      |              | Label No | 74168 | 3    |

### **SECTION 2: Hazards identification**

| Supplemental label elements   | :   |
|---|---|
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles | : Mot applicable.   |
| 2.3 Other hazards   |   |
| Product meets the criteria<br>for PBT or vPvB according<br>to Regulation (EC) No.<br>1907/2006, Annex XIII  | : This mixture does not contain any substances that are assessed to be a PBT or a vPvB. |
|   |   |

Other hazards which do : None known. not result in classification

### **SECTION 3: Composition/information on ingredients**

| 3.2 Mixtures : N<br>Product/ingredient name   | Aixture Identifiers  | %       | Classification  | Туре    |
|---|--|---------|---|---------|
| Propenoic acid, polymer with<br>2,2-bis(hydroxymethyl)<br>-1,3-propanediol, methyloxirane<br>and oxirane  | CAS: 144086-02-2   | ≤10     | Eye Irrit. 2, H319<br>Aquatic Chronic 2,<br>H411  | [1]     |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

#### Туре

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

### **SECTION 3: Composition/information on ingredients**

Occupational exposure limits, if available, are listed in Section 8.

### **SECTION 4: First aid measures**

| 4.1 Description of first aid r | neasures   |
|--------------------------------|--|
| Eye contact                    | : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.  |
| Inhalation                     | : Remove victim to fresh air and keep at rest in a position comfortable for breathing.<br>If not breathing, if breathing is irregular or if respiratory arrest occurs, provide<br>artificial respiration or oxygen by trained personnel. It may be dangerous to the<br>person providing aid to give mouth-to-mouth resuscitation. Get medical attention if<br>adverse health effects persist or are severe. If unconscious, place in recovery<br>position and get medical attention immediately. Maintain an open airway. Loosen<br>tight clothing such as a collar, tie, belt or waistband.   |
| Skin contact                   | : Wash with plenty of soap and water. Remove contaminated clothing and shoes.<br>Wash contaminated clothing thoroughly with water before removing it, or wear<br>gloves. Continue to rinse for at least 10 minutes. Get medical attention. In the<br>event of any complaints or symptoms, avoid further exposure. Wash clothing before<br>reuse. Clean shoes thoroughly before reuse.  |
| Ingestion                      | : Wash out mouth with water. Remove dentures if any. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |
| Protection of first-aiders     | : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.  |

### 4.2 Most important symptoms and effects, both acute and delayed

#### Over-exposure signs/symptoms

| Eye contact  | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness |
|--------------|--|
| Inhalation   | : No specific data.  |
| Skin contact | : Adverse symptoms may include the following:<br>irritation<br>redness                     |
| Ingestion    | : No specific data.  |

#### 4.3 Indication of any immediate medical attention and special treatment needed

| Notes to physician  | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul> |
|---------------------|---|
| Specific treatments | : No specific treatment.  |

## SECTION 5: Firefighting measures

| 5.1 Extinguishing media        |   |
|--------------------------------|---|
| Suitable extinguishing media   | : Use an extinguishing agent suitable for the surrounding fire. |
| Unsuitable extinguishing media | : None known.   |

#### 5.2 Special hazards arising from the substance or mixture

| Date of issue/Date of revision | : 20/11/2023 | Date of previous issue | : 25/09/2023 |   |
|--------------------------------|--------------|------------------------|--------------|---|
| TEKNOLUX AQUA 1429-42 - TS     | 16047 CLEAF  | २                      |              | L |

### **SECTION 5: Firefighting measures**

| _  | -  |
|--|--|
| Hazards from the substance or mixture          | : In a fire or if heated, a pressure increase will occur and the container may burst.<br>This material is harmful to aquatic life with long lasting effects. Fire water<br>contaminated with this material must be contained and prevented from being<br>discharged to any waterway, sewer or drain. |
| Hazardous combustion products                  | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide   |
| 5.3 Advice for firefighters                    |  |
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.  |
| Special protective equipment for fire-fighters | <ul> <li>Fire-fighters should wear appropriate protective equipment and self-contained<br/>breathing apparatus (SCBA) with a full face-piece operated in positive pressure<br/>mode.</li> </ul>  |

### **SECTION 6: Accidental release measures**

| 6.1 Personal precautions, pro  | te | ctive equipment and emergency procedures  |
|--------------------------------|----|---|
| For non-emergency<br>personnel | :  | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Avoid breathing vapour or<br>mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
| For emergency responders       | :  | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |
| 6.2 Environmental precautions  | :  | Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air). Water polluting material. May be harmful<br>to the environment if released in large quantities.   |

#### 6.3 Methods and material for containment and cleaning up

| Small spill                     | : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
|---------------------------------|---|
| Large spill                     | : Stop leak if without risk. Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |
| 6.4 Reference to other sections | : See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protective equipment.<br>See Section 13 for additional waste treatment information.   |

### **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

### **SECTION 7: Handling and storage**

|  | 5 5  |   |
|--|--|---|
| Protective measures                    | : Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest Avoid breathing vapour or mist. Avoid release to the environment. Keep in the original container or an approved alternative made from a compatible material, kep tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container. | t |
| Advice on general occupational hygiene | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |   |

#### 7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.

#### 7.3 Specific end use(s)

| Recommendations            | : Not available. |
|----------------------------|------------------|
| Industrial sector specific | : Not available. |
| solutions                  |                  |

### **SECTION 8: Exposure controls/personal protection**

#### 8.1 Control parameters

| o. i control parameters      |  |
|------------------------------|--|
| Occupational exposure limits |  |
| 2-Butoxyethanol              | EH40/2005 WELs (United Kingdom (UK), 1/2020). Absorbed |
| · · · · ·                    | through skin.  |
|                              | STEL: 50 ppm 15 minutes.                               |
|                              | TWA: 25 ppm 8 hours.                                   |
|                              | STEL: 246 mg/m <sup>3</sup> 15 minutes.                |
|                              | TWA: 123 mg/m <sup>3</sup> 8 hours.                    |
| 2-(2-butoxyethoxy)ethanol    | EH40/2005 WELs (United Kingdom (UK), 1/2020).          |
|                              | TWA: 10 ppm 8 hours.                                   |
|                              | STEL: 15 ppm 15 minutes.                               |
|                              | TWA: 67.5 mg/m³ 8 hours.                               |
|                              | STEL: 101.2 mg/m <sup>3</sup> 15 minutes.              |
| Ammonia                      | EH40/2005 WELs (United Kingdom (UK), 1/2020). [ammonia |
|                              | anhydrous]   |
|                              | STEL: 25 mg/m <sup>3</sup> 15 minutes. Form: anhydrous |
|                              | STEL: 35 ppm 15 minutes. Form: anhydrous               |
|                              | TWA: 25 ppm 8 hours. Form: anhydrous                   |
|                              | TWA: 18 mg/m <sup>3</sup> 8 hours. Form: anhydrous     |

#### **Biological exposure indices**

| Product/ingredient name | Exposure indices  |
|-------------------------|---|
| 2-Butoxyethanol         | EH40/2005 BMGVs (United Kingdom (UK), 8/2018)<br>BGV: 240 mmol/mol creatinine, butoxyacetic acid [in urine].<br>Sampling time: post shift.                                    |
| procedures nation       | ence should be made to appropriate monitoring standards. Reference to<br>al guidance documents for methods for the determination of hazardous<br>ances will also be required. |

#### **DNELs/DMELs**

| Product/ingredient name   | Туре | Exposure                 | Value                  | Population            | Effects  |
|---|------|--------------------------|------------------------|-----------------------|----------|
| <ul> <li>Propenoic acid, polymer with</li> <li>2,2-bis(hydroxymethyl)</li> <li>1,3-propanediol, methyloxirane and oxirane</li> </ul>                | DNEL | Long term Oral           | 0.13 mg/<br>kg bw/day  | General<br>population | Systemic |
|   | DNEL | Long term<br>Inhalation  | 0.232 mg/<br>m³        | General<br>population | Systemic |
|   | DNEL | Long term Dermal         | 0.27 mg/<br>kg bw/day  | General population    | Systemic |
|   | DNEL | Long term Dermal         | 0.53 mg/<br>kg bw/day  | Workers               | Systemic |

#### PNECs

No PNECs available

#### 8.2 Exposure controls

Appropriate engineering controls

: Sood general ventilation should be sufficient to control worker exposure to airborne contaminants.

Individual protection measures

### **SECTION 8: Exposure controls/personal protection**

| Hygiene measures                | : Wash hands, forearms and face thoroughly after handling chemical products,<br>before eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.   |
|---------------------------------|---|
| Eye/face protection             | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.  |
| Skin protection                 |   |
| Hand protection                 | : Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |
|                                 | Recommendations : Wear suitable gloves tested to EN374.   |
|                                 | > 8 hours (breakthrough time): Nitrile gloves. thickness > 0.3 mm   |
|                                 | Not recommended polyvinyl alcohol (PVA) gloves  |
| Body protection                 | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| Other skin protection           | <ul> <li>Appropriate footwear and any additional skin protection measures should be<br/>selected based on the task being performed and the risks involved and should be<br/>approved by a specialist before handling this product.</li> </ul>   |
| Respiratory protection          | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.  |
|                                 | Filter type (spray application): A P  |
| Environmental exposure controls | : Emissions from ventilation or work process equipment should be checked to<br>ensure they comply with the requirements of environmental protection legislation.<br>In some cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.   |

### **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

### **SECTION 12: Ecological information**

#### 12.2 Persistence and degradability

**Conclusion/Summary** : This product has not been tested for biodegradation.

#### **12.3 Bioaccumulative potential**

| Product/ingredient name   | LogPow | BCF | Potential |
|---------------------------|--------|-----|-----------|
| P-Butoxyethanol           | 0.81   | -   | Low       |
| 2-(2-butoxyethoxy)ethanol | 1      |     | Low       |

| 12.4 Mobility in soil |                  |
|-----------------------|------------------|
| Soil/water partition  | : Not available. |
| coefficient (Koc)     |                  |
| Mobility              | : Not available. |

#### 12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

**12.6 Other adverse effects** : No known significant effects or critical hazards.

### SECTION 13: Disposal considerations

| 13.1 Waste treatment meth         | ods   |
|-----------------------------------|---|
| Product                           |   |
| Methods of disposal               | : The generation of waste should be avoided or minimised wherever possible.<br>Disposal of this product, solutions and any by-products should at all times comply<br>with the requirements of environmental protection and waste disposal legislation and<br>any regional local authority requirements. Dispose of surplus and non-recyclable<br>products via a licensed waste disposal contractor. Waste should not be disposed of<br>untreated to the sewer unless fully compliant with the requirements of all authorities<br>with jurisdiction. |
| Hazardous waste                   | : The classification of the product may meet the criteria for a hazardous waste.  |
| European waste<br>catalogue (EWC) | : 080111*   |
| Packaging                         |   |
| Methods of disposal               | : The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.  |
| Special precautions               | : This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.   |
|                                   |   |
