# **SECTION 3: Composition/information on ingredients**

containing 1% or more of titanium dioxide particles with diameter  $\leq$  10 µm not bound within a matrix. Occupational exposure limits, if available, are listed in Section 8.

# SECTION 4: First aid measures

| SECTION 4. FIISLAIC                   | 1 1116430163   |  |  |  |  |  |
|---------------------------------------|--|--|--|--|--|--|
| 4.1 Description of first aid m        | neasures   |  |  |  |  |  |
| Eye contact                           | : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritatio occurs.   |  |  |  |  |  |
| Inhalation                            | : <b>R</b> emove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.  |  |  |  |  |  |
| Skin contact                          | : Ffush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.   |  |  |  |  |  |
| Ingestion                             | : Wash out mouth with water. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur. |  |  |  |  |  |
| Protection of first-aiders            | : No action shall be taken involving any personal risk or without suitable training.   |  |  |  |  |  |
| 4.2 Most important sympton            | ns and effects, both acute and delayed   |  |  |  |  |  |
| <u>Over-exposure signs/symp</u>       |  |  |  |  |  |  |
| Eye contact                           | : 📈 specific data.   |  |  |  |  |  |
| Inhalation                            | : 📈 specific data.   |  |  |  |  |  |
| Skin contact                          | : No specific data.  |  |  |  |  |  |
| Ingestion                             | : No specific data.  |  |  |  |  |  |
| 4.3 Indication of any immed           | iate medical attention and special treatment needed  |  |  |  |  |  |
| Notes to physician                    | <ul> <li>Freat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul>  |  |  |  |  |  |
| Specific treatments                   | : No specific treatment.   |  |  |  |  |  |
| SECTION 5: Firefigh                   | ting measures  |  |  |  |  |  |
| 5.1 Extinguishing media               |  |  |  |  |  |  |
| Suitable extinguishing media          | : $ abla$ se an extinguishing agent suitable for the surrounding fire.   |  |  |  |  |  |
| Unsuitable extinguishing media        | : None known.  |  |  |  |  |  |
| · · · ·                               | from the substance or mixture  |  |  |  |  |  |
| Hazards from the substance or mixture | : $\mathbf{K}$ a fire or if heated, a pressure increase will occur and the container may burst.  |  |  |  |  |  |
| Hazardous combustion<br>products      | : In a fire, decomposition may produce toxic gases/fumes.  |  |  |  |  |  |

| 5.3 Advice for firefighters                    |   |
|--|---|
| Special protective actions for fire-fighters   | : Fromptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.   |
| Special protective equipment for fire-fighters | <ul> <li>Fire-fighters should wear appropriate protective equipment and self-contained<br/>breathing apparatus (SCBA) with a full face-piece operated in positive pressure<br/>mode. Clothing for fire-fighters (including helmets, protective boots and gloves)</li> </ul> |

conforming to European standard EN 469 will provide a basic level of protection for

### **SECTION 6: Accidental release measures**

| 6.1 Personal precautions, pro   | tective equipment and emergency procedures   |
|---------------------------------|--|
| For non-emergency<br>personnel  | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Put on appropriate personal<br>protective equipment.   |
| For emergency responders        | : F specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |
| 6.2 Environmental precautions   | : Kvoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).  |
| 6.3 Methods and material for    | containment and cleaning up  |
| Small spill                     | : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.  |
| Large spill                     | : Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. |
| 6.4 Reference to other sections | : See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protective equipment.<br>See Section 13 for additional waste treatment information.  |

### SECTION 7: Handling and storage

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

| Protective measures                    | : 🗗 t on appropriate personal protective equipment (see Section 8).   |
|--|---|
| Advice on general occupational hygiene | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures. |

#### 7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.

Seveso Directive - Reporting thresholds (in tonnes)

7.3 Specific end use(s) **Recommendations** Industrial sector specific solutions

- : Not available.
- : Not available.

### **SECTION 8: Exposure controls/personal protection**

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.

#### 8.1 Control parameters

Occupational exposure limits

No exposure limit value known.

Recommended monitoring procedures : If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

#### **DNELs/DMELs**

| Product/ingredient name | Туре | Exposure                | Value                | Population         | Effects  |
|-------------------------|------|-------------------------|----------------------|--------------------|----------|
| <b>i</b> tanium dioxide | DNEL | Long term<br>Inhalation | 10 mg/m <sup>3</sup> | Workers            | Local    |
|                         | DNEL | Long term Oral          | 700 mg/kg<br>bw/day  | General population | Systemic |

#### **PNECs**

No PNECs available

| 8.2 Exposure controls               |   |
|-------------------------------------|---|
| Appropriate engineering<br>controls | : Sood general ventilation should be sufficient to control worker exposure to airborne contaminants.  |
| Individual protection meas          | ures  |
| Hygiene measures                    | : Wash hands, forearms and face thoroughly after handling chemical products,<br>before eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and<br>safety showers are close to the workstation location. |
| Eye/face protection                 | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.   |
| Skin protection                     |   |
| Hand protection                     | : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.   |
|                                     | Recommendations :Wear suitable gloves tested to EN374.<br>> 8 hours (breakthrough time): Nitrile gloves. thickness > 0.3 mm<br>Not recommended polyvinyl alcohol (PVA) gloves   |
| Body protection                     | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. Refer to European Standard EN 14605 for further<br>information on material and design requirements and test methods.  |
| Other skin protection               | : Repropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |

| FEKNOSEAL 4007-00 - All variants |              |                        |              | Label No :29203     |
|----------------------------------|--------------|------------------------|--------------|---------------------|
| Date of issue/Date of revision   | : 23/11/2021 | Date of previous issue | : 15/12/2020 | Version : 1.01 5/12 |

# SECTION 8: Exposure controls/personal protection

| •                               |  |
|---------------------------------|--|
| Respiratory protection          | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.   |
|                                 | Filter type (spray application): 🛛 🕂 P   |
| Environmental exposure controls | <ul> <li>Emissions from ventilation or work process equipment should be checked to<br/>ensure they comply with the requirements of environmental protection legislation.<br/>In some cases, fume scrubbers, filters or engineering modifications to the process<br/>equipment will be necessary to reduce emissions to acceptable levels.</li> </ul> |

|-------------------------|-------------------|
| PBT                     | : Not applicable. |
| vPvB                    | : Not applicable. |

**12.6 Other adverse effects** : No known significant effects or critical hazards.

### **SECTION 13: Disposal considerations**

| 13.1 Waste treatment method    | S |  |
|--------------------------------|---|--|
| <u>Product</u>                 |   |  |
| Methods of disposal            | : | The generation of waste should be avoided or minimised wherever possible.<br>Disposal of this product, solutions and any by-products should at all times comply<br>with the requirements of environmental protection and waste disposal legislation<br>and any regional local authority requirements. Dispose of surplus and non-<br>recyclable products via a licensed waste disposal contractor. Waste should not be<br>disposed of untreated to the sewer unless fully compliant with the requirements of<br>all authorities with jurisdiction. |
| Hazardous waste                | 1 | Within the present knowledge of the supplier, this product is not regarded as hazardous waste, as defined by EU Directive 2008/98/EC.  |
| European waste catalogue (EWC) | 1 | Ø80112   |
| Packaging                      |   |  |
| Methods of disposal            | : | The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.   |
| Special precautions            | : | This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.  |

# **SECTION 14: Transport information**

user

14.6 Special precautions for : **Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

#### **14.7 Transport in bulk** according to IMO instruments

: Not relevant/applicable due to nature of the product.

# SECTION 15: Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture EU Regulation (EC) No. 1907/2006 (REACH)

Annex XIV - List of substances subject to authorisation

1

#### **Annex XIV**

None of the components are listed.

Substances of very high concern

None of the components are listed.

Annex XVII - Restrictions

on the manufacture, placing on the market and use of certain dangerous substances,

mixtures and articles

Other EU regulations **Europe inventory** 

: Not determined.

Ozone depleting substances (1005/2009/EU) Not listed.

Prior Informed Consent (PIC) (649/2012/EU) Not listed.

**Seveso Directive** 

This product is not controlled under the Seveso Directive.

#### International regulations

Chemical Weapon Convention List Schedules I, II & III Chemicals

Not listed.

**Montreal Protocol** 

#### SECTION 15: Regulatory information Not listed. Stockholm Convention on Persistent Organic Pollutants Not listed. **Rotterdam Convention on Prior Informed Consent (PIC)** Not listed. **UNECE Aarhus Protocol on POPs and Heavy Metals** Not listed. 15.2 Chemical safety : This product contains substances for which Chemical Safety Assessments are still assessment required. SECTION 16: Other information Indicates information that has changed from previously issued version. Abbreviations and : ATE = Acute Toxicity Estimate CLP = Classification, Labelling and Packaging Regulation [Regulation (EC) No. acronyms 1272/2008]

DMEL = Derived Minimal Effect Level DNEL = Derived No Effect Level

Procedure used to derive the classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

EUH statement = CLP-specific Hazard statement PBT = Persistent, Bioaccumulative and Toxic PNEC = Predicted No Effect Concentration RRN = REACH Registration Number

vPvB = Very Persistent and Very Bioaccumulative

**Justification**
