Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2020/878 - Malta

## **SAFETY DATA SHEET**

UVILUX 1745-02 - RILLETOP TS 21131 RØD

### SECTION 1: Identification of the substance/mixture and of the company/ undertaking

### 1.1 Product identifier

Product name : UVILUX 1745-02 - RILLETOP TS 21131 RØD

**1.2 Relevant identified uses of the substance or mixture and uses advised againstProduct use**: Paint.

#### 1.3 Details of the supplier of the safety data sheet

Teknos Group Oy, Takkatie 3, FI-00370 HELSINKI, FINLAND. Tel. +358 9 506 091. e-mail address of person : Prod-safe@teknos.com

responsible for this SDS

#### **National contact**

Teknos Group Oy, Takkatie 3, FI-00370 HELSINKI, FINLAND. Tel. +358 9 506 091.

#### 1.4 Emergency telephone number

#### National advisory body/Poison Centre

 Telephone number
 : Malta Competition and Consumer Affairs Authority (MCCAA): +356 2395 2000

### **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture

Product definition : Mixture

Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Skin Irrit. 2, H315 Eye Dam. 1, H318 Skin Sens. 1, H317 Aquatic Chronic 2, H411

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

#### 2.2 Label elements

Hazard pictograms

| Signal word              | : Danger  |
|--------------------------|---|
| Hazard statements        | <ul> <li>H315 - Causes skin irritation.</li> <li>H317 - May cause an allergic skin reaction.</li> <li>H318 - Causes serious eye damage.</li> <li>H411 - Toxic to aquatic life with long lasting effects.</li> </ul>   |
| Precautionary statements |   |
| Prevention               | <ul> <li>P280 - Wear protective gloves. Wear eye or face protection.</li> <li>P273 - Avoid release to the environment.</li> </ul>   |
| Response                 | <ul> <li>P391 - Collect spillage.</li> <li>P305 + P351 + P338 + P310 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.</li> <li>Immediately call a POISON CENTER or doctor.</li> </ul> |

| Date of issue/Date of revision | : 01/12/2023 | Date of previous issue | : 19/07/2022 | Version  | :1.01            | 1/19 |

## SECTION 2: Hazards identification

| SECTION 2. Hazarus  | i C |   |
|---|-----|---|
| Storage   | 1   | Not applicable.   |
| Disposal  | :   | P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.  |
| Hazardous ingredients   | :   | Contains: Hexamethylene diacrylate; Dipropylenglycol diacrylate;<br>Propylidynetrimethanol, ethoxylated, esters with acrylic acid and pentaerythritol tetraacrylate |
| Supplemental label<br>elements  | :   | Warning! Hazardous respirable droplets may be formed when sprayed. Do not breathe spray or mist.  |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles | :   |   |
| 2.3 Other hazards   |     |   |
| Product meets the criteria<br>for PBT or vPvB according<br>to Regulation (EC) No.<br>1907/2006, Annex XIII  | :   | This mixture does not contain any substances that are assessed to be a PBT or a vPvB.   |
| Other hazards which do not result in classification   | :   | None known.   |

## **SECTION 3: Composition/information on ingredients**

| 3.2 Mixtures   | : Mixture   |                  |  |   |                |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section. <u>Type</u>

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[\*] The classification as a carcinogen by inhalation applies only to mixtures placed on the market in powder form containing 1% or more of titanium dioxide particles with aerodynamic diameter  $\leq$  10 µm not bound within a matrix.

Occupational exposure limits, if available, are listed in Section 8.

### **SECTION 4: First aid measures**

| 4.1 | Description | of first aid | measures |
|-----|-------------|--------------|----------|
|     |             |              |          |

| Eye contact                | : | Get medical attention immediately. Call a poison center or physician. Immediately<br>flush eyes with plenty of water, occasionally lifting the upper and lower eyelids.<br>Check for and remove any contact lenses. Continue to rinse for at least 10 minutes.<br>Chemical burns must be treated promptly by a physician.   |
|----------------------------|---|---|
| Inhalation                 | : | Get medical attention immediately. Call a poison center or physician. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. |
| Skin contact               | : | Get medical attention immediately. Call a poison center or physician. Wash with<br>plenty of soap and water. Remove contaminated clothing and shoes. Wash<br>contaminated clothing thoroughly with water before removing it, or wear gloves.<br>Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly<br>by a physician. In the event of any complaints or symptoms, avoid further exposure.<br>Wash clothing before reuse. Clean shoes thoroughly before reuse.   |
| Ingestion                  | : | Get medical attention immediately. Call a poison center or physician. Wash out<br>mouth with water. Remove dentures if any. If material has been swallowed and the<br>exposed person is conscious, give small quantities of water to drink. Stop if the<br>exposed person feels sick as vomiting may be dangerous. Do not induce vomiting<br>unless directed to do so by medical personnel. If vomiting occurs, the head should<br>be kept low so that vomit does not enter the lungs. Chemical burns must be treated<br>promptly by a physician. Never give anything by mouth to an unconscious person.<br>If unconscious, place in recovery position and get medical attention immediately.<br>Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or<br>waistband.  |
| Protection of first-aiders | : | No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.   |
|                            |   | nd effects, both acute and delayed  |
| Over-exposure signs/sympt  |   |   |
| Eye contact                |   | Adverse symptoms may include the following:   |

| Eye contact                    | : Adverse syr<br>pain<br>watering<br>redness | nptoms may include the | o following: |                  |      |
|--------------------------------|--|------------------------|--------------|------------------|------|
| Inhalation                     | : No specific                                | data.                  |              |                  |      |

| UVILUX 1745-02 - RILLETOF      | P TS 21131 RØD                               |                        |              | Label No :74811  |      |

|   | measures   |
|---|--|
| Skin contact                                      | : Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>blistering may occur   |
| Ingestion   | : Adverse symptoms may include the following: stomach pains  |
| 4.3 Indication of any immedi                      | ate medical attention and special treatment needed   |
| Notes to physician                                | : In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.  |
| Specific treatments                               | : No specific treatment.   |
| SECTION 5: Firefigh                               | ting measures  |
| 5.1 Extinguishing media                           |  |
| Suitable extinguishing media                      | : Use an extinguishing agent suitable for the surrounding fire.  |
| Unsuitable extinguishing media                    | : None known.  |
| 5.2 Special hazards arising f                     | rom the substance or mixture   |
| Hazards from the substance or mixture             | In a fire or if heated, a pressure increase will occur and the container may burst.<br>This material is toxic to aquatic life with long lasting effects. Fire water<br>contaminated with this material must be contained and prevented from being<br>discharged to any waterway, sewer or drain.   |
| Hazardous combustion<br>products                  | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>nitrogen oxides<br>phosphorus oxides<br>halogenated compounds<br>metal oxide/oxides  |
| 5.3 Advice for firefighters                       |  |
| Special protective actions for fire-fighters      | : Promptly isolate the scene by removing all persons from the vicinity of the incident there is a fire. No action shall be taken involving any personal risk or without suitable training.   |
| Special protective<br>equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection fo chemical incidents. |

### SECTION 6: Accidental release measures

| 6.1 Personal precautions, protective equipment and emergency procedures |   |  |  |  |  |  |
|---|---|--|--|--|--|--|
| For non-emergency<br>personnel  | : | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Do not breathe vapour or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |  |  |  |  |
| For emergency responders  | : | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |  |  |  |  |
| 6.2 Environmental precautions   | : | Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air). Water polluting material. May be harmful<br>to the environment if released in large quantities. Collect spillage.  |  |  |  |  |

| Date of issue/Date of revision | : 01/12/2023 | Date of previous issue | : 19/07/2022 | Version : 1.01 5/19 |
|--------------------------------|--------------|------------------------|--------------|---------------------|
| UVILUX 1745-02 - RILLETOP TS   | 21131 RØD    |                        |              | Label No :74811     |

| 6.3 Methods and material | for containment and cleaning up   |
|--------------------------|---|
| Small spill              | : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill              | : Stop leak if without risk. Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. |
| 6.4 Reference to other   |   |

### SECTION 7: Handling and storage

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

See Section 13 for additional waste treatment information.

See Section 8 for information on appropriate personal protective equipment.

#### 7.1 Precautions for safe handling

sections

| Protective measures                       | Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not breathe vapour or mist. Do not ingest. Avoid release to the environment. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|---|---|
| Advice on general<br>occupational hygiene | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |

#### 7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.

#### Seveso Directive - Reporting thresholds

#### **Danger criteria**

|    | Notification and MAPP threshold | Safety report threshold |
|----|---------------------------------|-------------------------|
| E2 | 200 tonne                       | 500 tonne               |

### **SECTION 8: Exposure controls/personal protection**

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.

### 8.1 Control parameters

Occupational exposure limits

| Product/ingredient name                         | Exposure limit values   |
|---|---|
| P-Methoxy-1-methylethyl acetate 2-Butoxyethanol | <ul> <li>EU OEL (Europe, 1/2022). Absorbed through skin. Notes: list of indicative occupational exposure limit values         TWA: 50 ppm 8 hours.         TWA: 275 mg/m<sup>3</sup> 8 hours.         STEL: 100 ppm 15 minutes.         STEL: 550 mg/m<sup>3</sup> 15 minutes.         EU OEL (Europe, 1/2022). Absorbed through skin. Notes: list         of indicative occupational exposure limit values         TWA: 20 ppm 8 hours.         TWA: 20 ppm 8 hours.         TWA: 98 mg/m<sup>3</sup> 8 hours.         STEL: 50 ppm 15 minutes.         STEL: 50 ppm 15 minutes.         STEL: 246 mg/m<sup>3</sup> 15 minutes.         STEL: 246 mg/m<sup>3</sup></li></ul> |

#### **Biological exposure indices**

| Product/ingredient name    | Exposure indices |
|----------------------------|------------------|
| No exposure indices known. |                  |

Recommended monitoring procedures : Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

#### **DNELs/DMELs**

| Product/ingredient name              | Туре   | Exposure                              | Value                  | Population | Effects                      |

| 8.2 Exposure controls            |   |
|----------------------------------|---|
| Appropriate engineering controls | : If user operations generate dust, fumes, gas, vapour or mist, use process<br>enclosures, local exhaust ventilation or other engineering controls to keep worker<br>exposure to airborne contaminants below any recommended or statutory limits.   |
| Individual protection meas       | <u>ures</u>   |
| Hygiene measures                 | : Wash hands, forearms and face thoroughly after handling chemical products,<br>before eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.   |
| Eye/face protection              | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles and/or face shield. If inhalation hazards exist, a full-face respirator may be required instead.  |
| Skin protection                  |   |
| Hand protection                  | : Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately |

### **SECTION 8: Exposure controls/personal protection**

|                                 | estimated.  |
|---------------------------------|---|
|                                 | Recommendations : Wear suitable gloves tested to EN374.   |
|                                 | < 1 hour (breakthrough time): Nitrile gloves. thickness > 0.3 mm  |
|                                 | 1 - 4 hours (breakthrough time): 4H / Silver Shield® gloves.  |
| Body protection                 | <ul> <li>Personal protective equipment for the body should be selected based on the task<br/>being performed and the risks involved and should be approved by a specialist<br/>before handling this product.</li> </ul>   |
| Other skin protection           | <ul> <li>Appropriate footwear and any additional skin protection measures should be<br/>selected based on the task being performed and the risks involved and should be<br/>approved by a specialist before handling this product.</li> </ul>   |
| Respiratory protection          | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.  |
|                                 | Filter type: A  |
|                                 | Filter type (spray application): A P  |
| Environmental exposure controls | : Emissions from ventilation or work process equipment should be checked to<br>ensure they comply with the requirements of environmental protection legislation.<br>In some cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels. |

### **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

Conclusion/Summary

: Causes skin irritation.

#### **Sensitisation**

| Product/ingredient name                              | Route of exposure | Species    | Result      |
|--|-------------------|------------|-------------|
| Phosphine oxide, phenylbis (2,4,6-trimethylbenzoyl)- | skin              | Guinea pig | Sensitising |

**Conclusion/Summary** : May cause an allergic skin reaction.

#### **Mutagenicity**

| Product/ingredient name                              | Test | Experiment        | Result   |
|--|------|-------------------|----------|
| Phosphine oxide, phenylbis (2,4,6-trimethylbenzoyl)- | -    | Subject: Bacteria | Negative |

**Conclusion/Summary** : Based on available data, the classification criteria are not met.

#### **Carcinogenicity**

It has been observed that the carcinogenic hazard of this product arises when respirable dust is inhaled in quantities leading to significant impairment of particle clearance mechanisms in the lung.

**Conclusion/Summary** : Based on available data, the classification criteria are not met.

#### **Reproductive toxicity**

| Conclusion/Summary | 1 | Based on available data, the classification criteria are not met. |
|--------------------|---|---|
|--------------------|---|---|

#### **Teratogenicity**

**Conclusion/Summary** 

: Based on available data, the classification criteria are not met.

#### Specific target organ toxicity (single exposure)

| Product/ingredient name   | Category                 | Route of exposure | Target organs                                       |

#### 12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

#### **12.6 Endocrine disrupting properties**

Not available.

#### 12.7 Other adverse effects

No known significant effects or critical hazards.

### **SECTION 13: Disposal considerations**

#### 13.1 Waste treatment methods

| Product                           |   |
|-----------------------------------|---|
| Methods of disposal               | : The generation of waste should be avoided or minimised wherever possible.<br>Disposal of this product, solutions and any by-products should at all times comply<br>with the requirements of environmental protection and waste disposal legislation and<br>any regional local authority requirements. Dispose of surplus and non-recyclable<br>products via a licensed waste disposal contractor. Waste should not be disposed of<br>untreated to the sewer unless fully compliant with the requirements of all authorities<br>with jurisdiction. |
| Hazardous waste                   | : The classification of the product may meet the criteria for a hazardous waste.  |
| European waste<br>catalogue (EWC) | : 080111*   |
| Packaging                         |   |
| Methods of disposal               | : The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.  |
| Special precautions               | : This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.   |
