

# AQUAFILLER 6500-01

## Intermediate coat for flow coating / dipping

AQUAFILLER 6500-01, a water-borne industrial intermediate product for new wood designated for exterior use such as windows and doors.

AQUAFILLER 6500-01 has pore-filling properties when treating hardwood.

### **TECHNICAL DATA**

Fields of application	Exterior doors, Windows
Recommended substrate	Hardwood, Softwood
Solids	Approx. 33% by weight
Viscosity	Approx. 14 s in DIN cup 4 mm at +20°C.
Volatile organic compound (VOC)	Approx. 28 g/l (DIRECTIVE 2010/75/EU) The VOC value provided is the average value for factory produced products, and consequently it will be subject to variations between individual products covered by this Technical Data Sheet.
Theoretical spreading rate	10-13 m²/l May vary according to wood quality and application method.
Colours	Colourless.
Storage	Storage temperature is +5°C - +30°C. Shelf life in unopened containers: See "Best before date" on the label. Keep containers tightly closed after use.
Packaging	Available in a range of standard pack sizes.
DIRECTION FOR USE	
Surface preparation	The wood must be free from wood dust and contamination. The moisture content of the wood should be approx. 13% and should not exceed 15%. Pretreatment is required for wood substrates not meeting Durability Class 3, EN 350:2016. Teknos has a range of preservative products meeting the requirements of EN 599-1, please contact Teknos for further guidance.
Application method	Dipping, Flow coating
Application conditions	<ul> <li>Stir thoroughly before use.</li> <li>Optimum temperature for products and surroundings: +18°C - +22°C.</li> <li>Optimum relative air humidity: Approx. 50%.</li> <li>Wet film range 75-100 μm.</li> <li>Due to evaporation, the solid content of the liquid must be adjusted with water regularly.</li> </ul>

Thinning	The product is delivered ready for use.
Drying time	+23°C / 50% RH
- dry to handle	1-2 hours
- fit for sanding and overcoating	<ul> <li>2-3 hours</li> <li>The drying time can be reduced using special drying systems to force drying. The drying times are approximate and may vary according to wood quality, temperatures, humidity, ventilation, and film thickness.</li> </ul>
Coating system	Intermediate treated parts must always be protected with a topcoat treatment before they are exposed to the influence of the weather.
Cleaning	Water.

#### **HEALTH AND SAFETY**

See safety data sheet.
