

---

<b>PAINT TYPE</b>	An alkyd primer for wooden, chipboard and similar surfaces outdoors.
<b>USAGE</b>	Priming external walls, doors etc. wooden surfaces outdoors when they are going to be top coated with acrylate, alkyd or oil paints.

---

**TECHNICAL DATA**

<b>Solids</b>	About 63 % by volume
<b>Volatile organic compound (VOC)</b>	EU VOC limit value (kat A/d): 300 g/l. The product's VOC: max. 300 g/l.
<b>Practical spreading rate</b>	8 - 10 m <sup>2</sup> /l
<b>Density</b>	abt. 1.4 g/ml
<b>Drying time at +23°C / 50% RH</b>	
- touch dry	after 6 hours
- overcoatable	after 16 hours
	The drying process will be slower in cold and/or damp.
	When PUUPOHJA is overcoated by dispersion paints the painting is done according to the instructions for these paints.
<b>Thinner, clean up</b>	TEKNOSOLV 1621 (solvent naphtha)
<b>Finish</b>	Semi-matt
<b>Colours</b>	White Can be tinted with tinting pastes to obtain light colours of Exterior colour card. The colour accuracy is not complete.
<b>Packages</b> (availability varies by country)	<b>White:</b> 0,9 L, 2,7 L , 9 L

**DIRECTION FOR USE****Surface preparation**

Unpainted surfaces should be treated as soon as possible. Clean the surfaces from loose wood fibre, dust, dirt and wash with RENSA FACADE facade cleaner, when needed. The surfaces are to be treated with clear wood preservative from the WOODEX series.

Previously painted wooden surfaces are cleaned from loose or poorly adherent paint, wood fibre and other impurities. Thereafter the surfaces are washed with RENSA FACADE facade cleaner. Replace rotten, mildewed and damaged wooden parts with new ones. Bare wood surfaces are to be primed with clear wood preservative from the WOODEX series.

PUUPOHJA is only to be applied on bare wooden surfaces that have been pretreated according to the instructions given above and not on old painted surfaces.

Bare metal surfaces are cleaned from loose rust, grease and dirt, wire brushed and primed with FERREX.

**Application**

Before use stir the paint thoroughly.  
Apply by brush, roller or spray.

**Application conditions**

The surface to be painted must be dry.  
The moisture of the wood must be below 20% of the dry weight of the wood.  
The surface to be painted has to be dry. During the application and drying period the temperature of the ambient air, the surface and the paint shall be above +5°C and the relative air humidity below 80%.
