

**PRODUCT TYPE
USAGE**

TEKNOSOLV 9500 is a solvent mixture used to diminish the thixotropic consistency of the paints of the FUTURA series. Thus the paints are made suitable for application by spraying.

DIRECTION FOR USE

The amount added to the paints of the FUTURA series in order to dilute them for spraying is 10 - 15% by volume.

The paint is diluted only so much that the applied paint film is without defects and of the recommended film thickness. Cf. spreading rates of the paint product used.

SAFETY MARKINGS

See Material Safety Data Sheet.

The information of this data sheet is based on laboratory tests and practical experience. The figures are for guidance only and depend on, for example, colour and gloss. As we have no control over the use and application conditions, we are only responsible for the quality of the product and guarantee that it conforms to our quality control. We accept no liability for any loss or damage resulting from the application of the product contrary to the directions or the intended use. The latest versions of our data sheets, material safety data sheets and system sheets are on our home pages www.teknos.com.
