

DATA SHEET 1060 08.05.2017 6

## SILORA A carpentry filler

| PRODUCT TYPE       | Ready-to-use, water-borne filler for carpentry work.   |
|--------------------|--|
| USAGE              | Used for filling on wooden interior surfaces, e.g. doors and furniture. Also suitable for primed metal surfaces. |
| SPECIAL PROPERTIES | SILORA A has good adhesion and filling capability, and it gives a very smooth surface.                           |
| APPROVALS          | The product has CE approval. Additional information: see page 2: "CE MARKING".                                   |

| TECHNICAL DATA                                   |   |
|--|---|
| Solids   | About 82 % by weight  |
| Layer thickness                                  | 0 - 2 mm  |
| Volatile organic compound<br>(VOC)               | The product is not included in the EU VOC directive.  |
| Practical spreading rate                         | For skimming the entire surface, 1 I/m <sup>2</sup> with 1 mm layer thickness. For partial filling of surfaces and filling of joints, two layers on gypsum board, abt. 0.3 I/m <sup>2</sup> . |
| Particle size                                    | Max. 0,03 mm  |
| Density  | 1.8 g/ml  |
| Drying time +23°C, the relative air humidity 50% | 1 - 2 hours/mm depending on the layer thickness.  |
|  | The drying process will be slower in cold and/or damp.  |
| Clean up   | Water   |
| Colours  | White   |
| Packages<br>(availability varies by country)     | 0,4 L, 3 L  |
| SAFETY MARKINGS                                  | See Safety Data Sheet.  |

SAFETY MARKINGS

See Safety Data Sheet.

ΡΤΟ

| DIRECTION FOR USE      |  |
|------------------------|--|
| Surface preparation    | Clean new surfaces from dust and dirt.<br>Wash previously painted surfaces with RENSA SUPER paint cleaner.<br>Matt down hard or gloss surfaces by sanding and thereafter remove the dust.<br>Brittle substrates and untreated wooden and metal surfaces must be primed before the filler<br>is applied.  |
| Application            | Apply the filler by trowel. The number of layers is dependent on the surface roughness. The dried filler can be painted or wall-papered. Before wall-papering the filler surfaces must be primed with adhesive.<br>The use of protective mask for eyes and face is recommended when grinding the filler. |
| Application conditions | The surface to be treated must be dry.<br>The temperature of the air, the surface and the filler shall be above +5°C and the relative<br>humidity of the air below 80% during the time of application and drying.  |
| Storage                | To be stored in a cool place. Must not freeze. Storage stability is 1 year in unopened package.  |

## **CE MARKING**

| CE  |            |  |  |
|---|------------|--|--|
| Teknos Oy<br>Takkatie 3, P.O. Box 107<br>00371 Helsinki, Finland<br>13                  |            |  |  |
| EN 15824<br>Finishing materials for plasterboard.<br>Interior use.<br>Hand application. |            |  |  |
| Adhesion  | > 0,35 MPa |  |  |
| Reaction to fire  | B-s1, d0   |  |  |

The information of this data sheet is based on laboratory tests and practical experience. The figures are for guidance only and depend on, for example, colour and gloss. As we have no control over the use and application conditions, we are only responsible for the quality of the product and guarantee that it conforms to our quality control. We accept no liability for any loss or damage resulting from the application of the product contrary to the directions or the intended use. The latest versions of our data sheets, material safety data sheets and system sheets are on our home pages www.teknos.com.
