

WOODEX® PREMIUM

PROLONGING THE MAINTENANCE INTERVAL

LONG-LASTING WOOD STAIN DESIGNED FOR SUPERIOR PROTECTION AGAINST WEATHER

- Maintenance intervals extended two to three times longer in comparison with conventional wood stain products
- Easy to apply – no dripping or sagging
- Overcoatable after two hours
- Beautiful deep colours with an even finish
- Excellent colour retention
- Tinted to Teknos' Translucent colours
- For use externally on wooden façades, timber surfaces, doors, window frames and fences

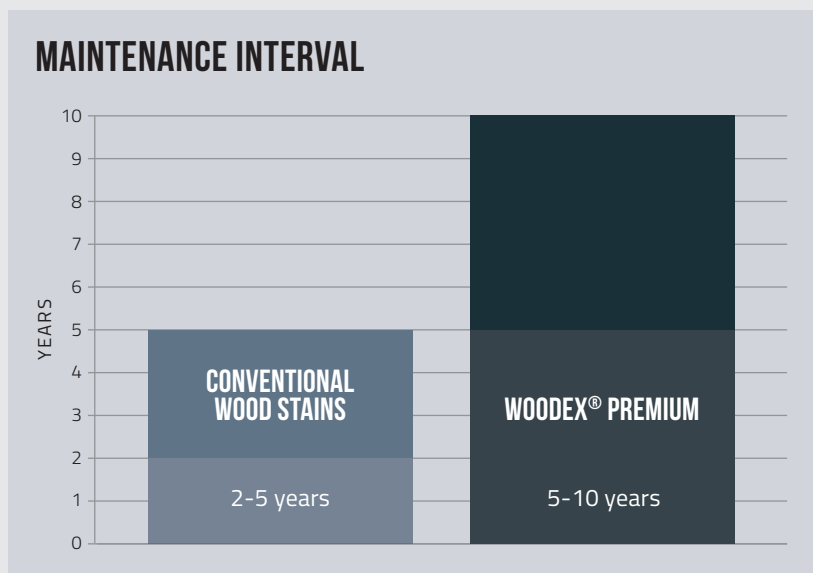

WOODEX® PREMIUM Wood stain ensures the most durable and long-lasting translucent finish for wooden buildings.

WOODEX® PREMIUM has excellent adhesion and ensures you can enjoy care free living with maintenance periods extended two to three times longer than with conventional wood stains. With excellent weathering resistance, and protection from moisture, dirt and UV degradation WOODEX® PREMIUM is not only premium of quality but also in appearance. It is easy to apply, levels nicely and gives an even, matt finish. The translucent colours look beautiful, allowing the natural grain and texture of wood show through.

Overcoating time is short, only two hours* which enables dual application within the same day. Previously untreated wood should be coated twice with WOODEX® PREMIUM to achieve the longer maintenance intervals.

* The drying process will be slower in cold and/or damp.

- Waterborne wood stain for exterior use
- Longer maintenance intervals
- Superior weather resistance
- Easy to apply
- Overcoatable after two hours
- Excellent colour retention
- Tinted to Teknos' Translucent colours

For new unpainted wood and wood previously treated with wood stain, e.g. walls, doors, window frames, fences and poles. Recommended especially for log surfaces.
