

# FERREX® COMBI CORROSION PROTECTIVE PAINT FOR METAL SURFACES

## WATERBORNE 2 IN1 ANTICORROSIVE PAINT FOR METAL SURFACES

- Combination primer and topcoat
- No need for a separate primer
- Tintable
- Very high corrosion protection
- Outstanding colour and gloss retention
- Great for maintenance painting
- Semi-matt finish

## FERREX® COMBI – HIGH PROTECTION AGAINST CORROSION

Metal surfaces are exposed to moisture and various weather conditions therefore they need to be protected from corrosion.

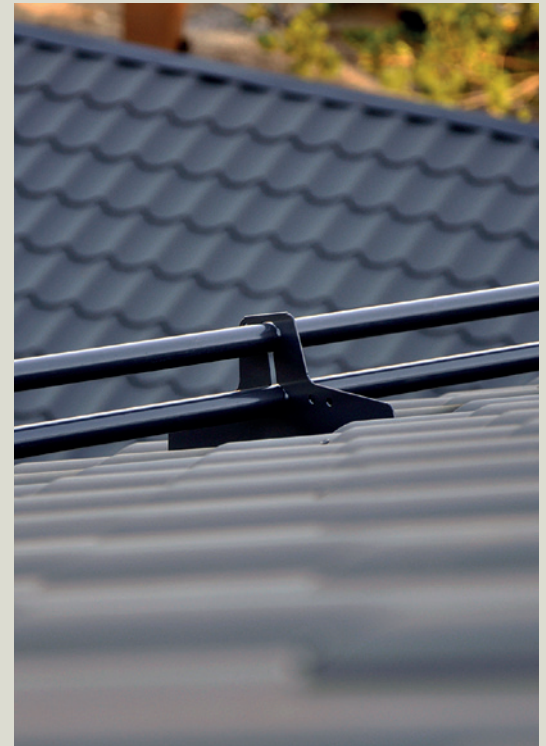

**FERREX® COMBI is a truly unique and innovative premium product, based on modern paint chemistry.** It effectively prevents the formation of rust beneath the paint film even in the harshest conditions. As a waterborne paint FERREX® COMBI is pleasant and safer to use than traditional solvent based anticorrosive paints, whilst giving superior protection. FERREX® COMBI also benefits from amazing colour and gloss retention, so the painted surfaces seem freshly painted even after years.

## 2 IN 1 – NO SEPARATE PRIMER NEEDED

Renew faded, old and rusted metal surfaces with FERREX® COMBI. You get both primer and top coat at the same time, no separate primer needed. Get the job done easily just by one can of paint and with the desired colour. In addition to white and premixed colours grey and black, FERREX® COMBI can be tinted to wide range of colours from Exterior colours card.

## PROTECTION AGAINST CORROSION IN ALL CONDITIONS

FERREX® COMBI is very durable and gives superior protection to metal surfaces in all conditions. When used as white or premixed grey and black, it is possible to achieve the very high corrosion class C5. As tinted, corrosion class is high C4. Even at coastal areas with high humidity, extreme weather and moderate salt impact FERREX® COMBI is the right choice for protecting metal surfaces. Having low VOC content, waterborne FERREX® COMBI can also be used indoors on water pipes and radiators both in dry and high humidity spaces e.g. bathrooms.

## VERSATILE APPLICATIONS

- Sheet-metal roofs and facades
- Railings
- Support columns
- Ladders
- Trailers
- Machinery
- Metal parts of boats (above the waterline)
- Furniture
- Doors and windows

CORROSION CLASS	EXTERIOR
C1 Very low	Not for exterior
C2 Low	Atmospheres with low level of pollution: mostly rural areas
C3 Medium	Urban and industrial atmospheres, moderate sulfur dioxide pollution; coastal areas with low salinity
C4 High	Industrial areas and coastal areas with moderate salinity
C5 Very High	Industrial areas with high humidity and aggressive atmosphere

## FERREX® COMBI WATERBORNE ANTICORROSIVE PAINT

- Waterborne
- 2in1, no separate primer needed
- Semi-matt finish
- Colours: Base 1 and Base 3, can be tinted to Exterior colours, premixed colours grey and black
- Spreading rate 8-10 m<sup>2</sup>/l
- Package sizes: Base 1 and Base 3 0,45l, 0,9l, 2,7l, 9l, 18l  
Premixed colours 0,5l, 1l, 3l, 10l, 20l
