COLOUR YOUR STORY

THE NEW, SUSTAINABLY-MADE COLOURS FROM TEKNOS

Created by our expert colour designers, the **Colour Your Story** collections take inspiration from the Nordic scenery and Scandinavian style.

The clean, honest colours and playful shades are easy to use as part of different decorative styles.

By choosing Teknos interior paint, you're selecting a high-quality, Finnish product that has been made sustainably and with respect towards the environment.

Let the new Teknos colour collections help you bring your own personal style to life - and reignite your love of home.

SUSTAINABILITY

Granted by Nordic Ecolabelling, the criteria takes into account the stages of the product lifecycle that have the biggest impact on the environment, including: The raw materials used, the quality of the product and even the instructions on the can.

M1 classification is a voluntary labelling system for low-emitting construction materials or furniture used indoors. The criteria for M1-certified building material was published for the first time in 1996 . The classification is granted by the Building Information Foundation RTS, a leading provider of construction information in Finland

The antimicrobial functionality of BioCote® technology gives antimicrobial properties for the paint coat, making it more hygienic and protecting it against several microbes such as bacteria and mould.

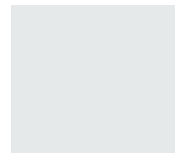

The label granted by the Finnish Allergy, Skin and Asthma Federation (a non-profit public organization) tells that the product has been developed ensuring its maximal safety for allergy, asthma and skin disease patients

WE'RE EASY ON
THE ENVIRONMENT

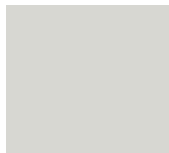

NORDIC PHENOMENA

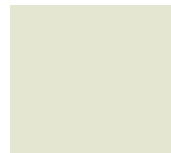

Nordic Phenomena is a collection of cool, calm colours with hues of blue and green that bring northern themes into your home. Shades of refreshing water and ancient forests take you closer to nature, creating a tranquil atmosphere.

FUTURA[®] AQUA

Versatile paint series for interior & exterior woodwork

Our water-borne, low emission FUTURA AQUA paints are suitable for painting wood and metal surfaces, such as furniture, doors and windows – both indoors and outdoors.

Excellent durability and easy application bring efficiency to painting whether you're a professional or DIY enthusiast.

FUTURA AQUA paints meet the requirements of the Toy Safety Directive (2009/48/EC) and are safe for use in toys and children's furniture.

FERREX[®] COMBI

Water-borne anticorrosive paint for metal

Most anticorrosive paints need a separate primer for protection and adhesion. With FERREX COMBI you get both primer and topcoat at the same time; no separate primer is needed. When tinted, FERREX COMBI achieves up to high corrosion class C4, making it usable for industrial areas, coastal areas with moderate salinity as well as chemical plants and swimming pools.

FERREX COMBI can be painted over lightly rusted or bare metal providing excellent adhesion for metal surfaces. But make sure that before painting you remove all loose and flaking rust using a metal brush or sandpaper.

SILOKSAN FACADE

Full Matt - Exterior wall paint

SILOKSAN FACADE is a water-borne, full-matt silicone emulsion based paint for mineral surfaces.

The paint is moisture vapour permeable and water-repellent.

Suitable for new and previously painted facades outdoors, e.g. concrete, plaster, burnt brick, lime-sand brick and mineral boards.

It does not require any separate priming coat on most unpainted or previously painted surfaces, when SILOKSAN GEL is added into the paint for the first coat.

HELO[®] AQUA

Clear and translucent varnish for interior & exterior wooden surfaces

Suitable for wooden surfaces including furniture, window frames, mouldings, doors, wooden plank floors, stairs, walls and ceilings.

HELO AQUA varnishes offer a highly durable finish in three gloss levels; semi-matt 20, semi-gloss 40, and gloss 80.

When tinted to our translucent colours you will get higher protection against UV radiation. HELO AQUA varnishes are suitable both for interior and exterior use.

WOODEX[®] AQUA CLASSIC

Water-borne transparent woodstain for exterior use

Available in a range of translucent colours, WOODEX AQUA CLASSIC is a great way to protect your exterior wooden surfaces

Suitable for new wood and wood previously treated with non film-forming wood stains, e.g. walls, doors, window frames, fences and poles. Recommended especially for log surfaces.

WOODEX[®] AQUA WOOD OIL

Water-borne wood oil for exterior use

Natural oil for the protection of garden deck floors, jetties and wooden garden furniture. Other suitable objects are fences, trellises, doors and stairs.

Apply by brush, sponge or by dipping.

WOODEX AQUA WOOD OIL protects wooden surfaces from weathering all year round.

Brush Roller Spray Water based Tinting available Coverage 8m-10m²/l Suitable for exterior use

FIND THE RIGHT COLOUR FOR YOU

We have designed the Colour Your Story collections to make the process of choosing the right colour for you a breeze. Our colour designers have put together some useful tips to help you find the perfect colours and choose the right products.

DIMMA PÅ HAVET
T1772

HELLO DARKNESS
T1756

CHOOSE THE RIGHT PAINT FOR THE SURFACE

Paints have different purposes so to achieve the best results match your paint with the material (wood, metal, plasterboard) and the surface (ceiling, walls, floor, furniture). **Take the usage requirements, such as the need for regular cleaning, into account.** Glossier surfaces are easier to keep clean.

FUTURA® AQUA -furniture paint for wood and metal surfaces is suitable for indoor and outdoor use. Choose from different sheens from matt to gloss. FUTURA® AQUA can be mixed in any colours from the Colour Your Story collections and is easy and safe to use in the home.

MATCH THE PAINT WITH ITS ENVIRONMENT

Let your dreams and preferences guide you in finding the right colours for you. Painting test swatches can make choosing easier. It is important to select the colour in the right lighting. For example, store lighting can be very different from the lighting in your home.

Shades and sheens can be used to influence the mood of the space. **A semi-matt sheen creates a calmer ambience because the surface will reflect less light.**

GLOSS BRINGS COLOURS ALIVE

The level of gloss can alter how the colour is perceived. A gloss paint makes the colour feel deeper and a matt finish softens the shade.

Water-borne, full-matt **TEKNOCEILING 02** is the perfect option for ceilings with critical lighting.

CHOOSE THE RIGHT LEVEL OF SHEEN

ANCILLIARIES

RENSA ANTI-MOULD

Protection against mildew

RENSA ANTI-MOULD kills mildew, lichen and algae growth from external surfaces of buildings. It is easy to spray on e.g. tile and felt roof, stone paving, brick wall or fence and let the growth be removed by the effects of weather. RENSA ANTI-MOULD disinfects the surface and gives a long-term protection. RENSA ANTI-MOULD is a biodegradable product. It meets the requirements by OECD and by the Detergent regulation of European Parliament and the Council on detergents for biodegradability (OECD 301B, EC 648 / 2004).

RENSA SUPER

Universal detergent

RENSA SUPER is an efficient universal detergent for washing of all kind of building surfaces and for pre-treating surfaces before painting. For in- and outdoor use. RENSA SUPER is an evaporating detergent, so you don't need to rinse it off with water. Using the detergent is quick and easy: wipe off the dirt, let it dry for 5 minutes and paint. RENSA SUPER is a biodegradable product. It meets the requirements by OECD and by the Detergent regulation of European Parliament and the Council on detergents for biodegradability of all used raw material (OECD 301B, EC 648 / 2004).
