

HELO® AQUA ENHANCES THE NATURAL APPEARANCE OF WOOD

HELO® AQUA PROTECTIVE VARNISH FOR WOOD

- Enhance the natural appearance of wood
- Durable protection
- Wooden doors, windows and furniture indoors and outdoors
- Wooden plank floors, stairs, walls and ceilings indoors
- Tintable to translucent colours

UV-protected HELO® AQUA varnishes give durable protection for wood both indoors and outdoors.

Choose the perfect translucent colour or simply go for a clear finish. For outdoor use we recommend to use HELO AQUA as tinted to get even stronger protection against UV-radiation.

HELO AQUA varnishes dry quickly so you are able to apply multiple layers in a day to get the job done faster.

HELO® AQUA is even safe to use for toys as they meet the requirements of toy safety standard EN 71-3:2019 for limit values for migration of chemical elements.

- For interior and exterior use
- UV-protected (when tinted)
- Variety of glosses
- Overcoatable during the same day
- Tintable to translucent colours
- Safe to use for toys

Suitable for wooden doors, windows and furniture indoors and outdoors. And for wooden plank floors, stairs, walls and ceilings indoors.
