## RENDERED SURFACES

### MAINTENANCE INSTRUCTIONS FOR RENDERED FACADES PAINTED WITH:

Siloksan Facade

Siloksan Anti-carb

Siloksan Sand

Saku

Silikatfärg

**Note!** When washing rendered facades, we advise against using a high-pressure washer.

Many rendered facades have suffered major and costly damage due to high pressure washing.

The wall surfaces to be washed must be in good condition. If the wall surface sucks up water before you start washing, we advise against the use of facade washing. Instead, we recommend brushing the surface, as well as a repainting.

### Cleaning of painted plaster, concrete and light concrete facades in good condition

Wash with lukewarm water. Use RENSA FAÇADE facade cleaner. Wet the surface with water, then apply the detergent with a scrubbing brush or similar and leave it to act according to the instructions, rinse off the detergent thoroughly with a water hose and normal water pressure.
