WOODWORK

MAINTENANCE INSTRUCTIONS FOR INTERIOR JOINERY, DOORS, KITCHEN DOORS, MOLDINGS, ETC. PAINTED OR VARNISHED WITH:

Futura Aqua 5, 20, 40 and 90

Helo Aqua 20, 40 and 80

Natura 15 and 40

Futura 15, 40 and 90

Helo 15, 40 and 90

CLEANING PAINTED SURFACES

Use synthetic detergents that do not contain solvents. The surfaces are washed with RENSA SUPER Paint cleaner or with water and a mild detergent. After that, the surfaces are rinsed off with lukewarm water. Wash from the bottom up to avoid stripes after the water. Never use alcohol or too strong detergents as the paint may become stained. Ammonia and ammonia vapors can discolour painted surfaces. Note! Do not use too hot water.

CLEANING OF STAINED SURFACES

For cleaning, only a moistened cleaning cloth is used. More vigorous cleaning requires the surface to be overcoated.

CLEANING OF LACQUERED SURFACES

When cleaning lacquered surfaces, we recommend RENSA SUPER Paint cleaner. Never use spirits or strong organic solvents. Always wash from the bottom up to avoid stripes. Rinse thoroughly with lukewarm water and ventilate the moist air.

STAIN REMOVAL

Mold washing can fade away some stains (used with care). Food vinegar can be used to remove rust stains. Black discolorations resulting from rubbing metal against the surface can usually be removed with a regular eraser.
