**A fully factory applied opaque coating system for Accoya®.**

**Designed for application by automatic or manual high pressure spray.**

#### Application Information

Apply at temperatures between 15°C and 35°C, and humidity levels below 80% RH. Low temperature and high humidity may inhibit curing.

The surface temperature must be at least 3°C above the dew point to prevent moisture condensation during the curing process.

The surface to be coated must be clean, dry and free from dust and grease.

AQUATOP® 2600 opaque is available in standard and bespoke colours.

#### Further information

Further product information can be found in the Technical Datasheets at [teknos.com](http://teknos.com)

#### Important Notes

- Light de-nibbing after the midcoat is necessary to ensure optimum film uniformity.
- Wood preservative is required for timber not meeting Class 3 EN 335-2
