# Surface properties beyond comparison

## **TEKNOPUR 300 elastomeric coating** Functional pure polyurea technology

### **Extremely fast curing**

Polyurea is a technology where an extremely tolerant and fast-setting coating is created by adjusting properties of two reactive components. Curing takes place within seconds rather than minutes.

### **One of the most resistant coatings in the world**

Due to its toughness and elasticity, TEKNO PUR 300 withstands high abrasion, impacts and extreme mechanical loads. It also creates a seamless waterproof paint film that gives matchless protection to the surface beneath the coating. TEKNO PUR 300 is highly resistant to corrosion and chemicals.

When it comes to operational temperatures, TEKNO PUR 300 offers a wide temperature area. Typical usage temperatures are from 40 degrees below zero up to +150 degrees C.

### **Environmentally friendly**

Solvent-free TEKNO PUR 300 emits no volatile organic compounds and therefore it is an environmentally friendly choice as well.
