Teknos has strong and well-documented proof of its expertise in the surface treatment for internal and external pipeline applications. Teknos has an extensive product range and can provide the correct painting solutions for the pipelines in different environments, including onshore and offshore. Teknos’ technical service engineers have a wide experience in the industrial painting field, and they are happy to help you. For further information, please contact your local Teknos’ representative.

With TEKNOPOX 3297 Teknos expands the product range with its latest development for pipeline coatings – the next Generation of Flow Coat. The new Flow Coat is an innovative alternative for all pipe coaters who strive to improve their profitability without sacrificing the high quality. TEKNOPOX 3297 is an almost solvent-free, epoxy-based Flow Coat, designed to improve flow of natural gas in the gas pipeline. The product was developed to meet more and more stringent requirements regarding solvent emissions as well as occupational health and safety of employees.

**TEKNOPOX 3297**

- over 20 % more spreading rate at 100 µm m²/l
- minimized environmental impact
- over 80 % VOC reduction
- more than 20 % higher solids
- reduced surface roughness
- no increase in applied coating thickness
- excellent, smooth surface
- fast curing

**Your benefits at a glance**

- solids %-vol

- spreading rate at 100 µm m²/l

- Rz surface roughness, µm

The Teknos Group

Teknos is one of Europe’s leading suppliers of industrial coatings with a strong position in retail and architectural coatings, too. Teknos has its own production in seven countries: Finland, Sweden, Denmark, Germany, Poland, Russia and China. In addition, Teknos has sales companies in 15 countries and exports to over 20 countries via a well-established network of dealers.

Teknos was established in 1948 and is one of Finland’s largest family-owned businesses.
