

FERREX[®] COMBI

ANTI-CORROSIVE METAL PAINT

WATERBORNE 2 IN1 ANTI-CORROSIVE PAINT FOR METAL SURFACES

- Primer and topcoat in one
- Apply direct to metal
- Choose any colour
- Very high corrosion protection
- Outstanding colour and gloss retention
- Great for maintenance painting
- Semi-matt finish

RUST PREVENTION

FERREX® COMBI effectively prevents the formation of rust beneath the paint film even in the harshest conditions.

As a waterborne paint, FERREX® COMBI is easier and safer to use than traditional solvent based paints. FERREX® COMBI also benefits from amazing colour and gloss retention, so the painted surfaces look freshly painted for longer.

2 IN 1 – NO SEPARATE PRIMER NEEDED

Renew faded, old and rusted metal surfaces with FERREX® COMBI. You get both primer and top coat at the same time, no separate primer needed. Get the job done easily with just one can of paint in your desired colour. FERREX® COMBI can be tinted to wide range of colour.

PROTECTION AGAINST THE HARSHEST CONDITIONS

FERREX® COMBI is highly durable and gives superior protection to metal surfaces in all conditions.

When tinted to our wide range of colours, FERREX® COMBI achieves corrosion class C4. This means FERREX® COMBI will protect metal surfaces, even at coastal areas with high humidity, extreme weather and moderate salt impact.

Having low VOC content, waterborne FERREX® COMBI can also be used indoors on water pipes and radiators both in dry and high humidity spaces such as bathrooms and kitchens.

Recommended substrates: Iron, steel, zinc-coated steel, galvanized sheet steel (roof and facade sheets), aluminium, copper and surfaces previously painted or primed with acrylate, alkyd, polyurethane, epoxy and polyester binder based coatings. Adhesion on prefabrication primers is also good.

VERSATILE APPLICATIONS

- Sheet-metal roofs and facades
- Railings
- Support columns
- Radiators and pipes
- Trailers
- Machinery
- Metal parts of boats (above the waterline)
- Furniture
- Doors and windows

CORROSION CLASS	EXTERIOR
C1 Very low	Not for exterior
C2 Low	Atmospheres with low level of pollution: mostly rural areas
C3 Medium	Urban and industrial atmospheres, moderate sulfur dioxide pollution; coastal areas with low salinity
C4 High	Industrial areas and coastal areas with moderate salinity

FERREX® COMBI WATERBORNE ANTI-CORROSIVE PAINT

- Waterborne
- 2in 1, no separate primer needed
- Semi-matt finish
- Colours: Choose from the Teknos Exterior range, NCS, RAL and many more
- Spreading rate 7-9 m²/l
- Package sizes: 0,9l, 2,7l & 9l
