

Teknos PENTO FLUID SILVERWOOD for wood

A WEATHERED LOOK FOR NEW CLADDING, WHICH ALSO PROTECTS

Allows new cladding to blend seamlessly with the surroundings by giving a lightly weathered look to wooden substrates.

HOW IT WORKS

The water-borne coating reduces moisture ingress which protects the wood while the natural weathering process takes place. By reducing the swelling and shrinkage of the wood the coating encourages a more evenly weathered surface.

ONE-COAT PRODUCT

You only need one coat to achieve this look and protect the wood from moisture, making sure that you coat the joints as well as the front and back of each cladding board.

APPLICATION

PENTO FLUID SILVERWOOD can be applied by airless, airmix spray or brush machine and is suitable for Spruce, Fir, Larch and Douglas Fir.

APPLICATION GUIDE FOR PENTO FLUID SILVERWOOD

PLANED/SANDED WOOD		
1st coat	PENTO FLUID SILVERWOOD	80-100 g/m ²
If an optional 2nd coat is desired, apply PENTO FLUID SILVERWOOD at 60-80 g/m ²		
ROUGH SAWN WOOD		
1st coat	PENTO FLUID SILVERWOOD	120-150 g/m ²
If an optional 2nd coat is desired, apply PENTO FLUID SILVERWOOD at 80-100 g/m ²		

*Pretreatment is required for timber substrates not meeting Durability Class 3, EN 350:2016. Teknos preservative products meeting the requirements of EN599-1 include TEKNOL AQUA 1410-01, AQUAPRIMER 2907-02 and TEKNOL AQUA 1412-01.
