## METAL PAINTS THAT MATCH

Designed for small batch production with fast delivery, INFRALIT PE 8350-20 POWDER MIX is powder coating for businesses who usually coat in wet paint. Offer your customers the seamless look of metal beading matched to a window's opaque colour, guttering which blends with a garden room shade or decorative finials which top off a conservatory.

Our small batch, short turnaround powder production means that your contract powder coaters can get the job done fast, reducing downtime for the rest of the job going through your wet paint line.

POWDER MIX is highly durable and holds Class 1 Qualicoat approval for outdoor colour and gloss retention. It is easily colour matched to standard shades or a customer's particular colour choice.

## SMALL BATCH ORDERING

We have an extensive colour database including RAL and NCS and can match bespoke shades with a physical sample (extended lead time). Small batch production means only ordering what you need, resulting in less waste; better for your business and the planet.

- Order in quantities as small as 5kg or up to 100kg
- Fast production (2-3 days average) to your specification
- Cures in 9-10 minutes depending on metal temperature (180-190°C)
- Smooth, semi-gloss finish after application
- Suitable for aluminium or steel surfaces

**INFRALIT PE 8350-20 POWDER MIX is the easy way to complement and add value to your wood product line.**

## MAIN FEATURES

Qualicoat and GSB approved for durability

Small batch production from 5kg

Excellent UV and corrosion resistance

Short lead time, mixed to your specification
