Sand Grey

Concrete Grey

Stone Grey

Slate Grey

Basalt Brown

Coal Brown

Lime Brown

Clay Brown

Colour range images display 1 coat of TEKNOCLAD SILVER applied to planed, sanded Larch

Colour accuracy statement

We have produced this colour card as accurately as the printing process will allow. However, paint versions of these colours may be a shade different therefore we cannot guarantee an exact match. Once paint is applied, the substrate and texture of a surface can change the appearance of the final colour, as can adjacent coloured surfaces and lighting. Before committing to a large order we recommend testing the paint colour on the actual surface to be painted.

Teknos TEKNOCLAD SILVER for wood

A WEATHERED LOOK FOR NEW CLADDING, WHICH ALSO PROTECTS

Allows new cladding to blend seamlessly with the surroundings by giving a lightly weathered look to wooden substrates.

HOW IT WORKS

The water-borne coating reduces moisture ingress which protects the wood while the natural weathering process takes place. By reducing the swelling and shrinkage of the wood the coating encourages a more evenly weathered surface.

ONE-COAT PRODUCT

You only need one coat to achieve this look and protect the wood from moisture, making sure that you coat the joints as well as the front and back of each cladding board.

APPLICATION

TEKNOCLAD SILVER can be applied by airless, airmix spray or brush machine and is suitable for Spruce, Fir, Larch and Douglas Fir.

APPLICATION GUIDE FOR TEKNOCLAD SILVER

PLANED/SANDED WOOD		
Layer 1	TEKNOCLAD SILVER	80-100 g/m ²
ROUGH SAWN WOOD		
Layer 1	TEKNOCLAD SILVER	120-150 g/m ²

*Pretreatment is required for timber substrates not meeting Durability Class 3, EN 350:2016. Teknos preservative products meeting the requirements of EN599-1
